1. The towers turned to dust in mid-air.

2. There was extremely little debris left at the WTC site.

3. There was dust and paper everywhere across southern Manhattan.

4. The seismic reading was extremely weak, and caused by weight being lifted off the ground.

5. All seven WTC buildings were destroyed on 9/11, and all in unusual ways.

6. Hundreds of people fell, many of which were seen to “disintegrate”.

“When she hit [the ground], there was nothing left.”

James Logozzo (witness)

“There was no human resemblance whatsoever.”

Eric Thompson (witness)

“[...] the whole body would just disintegrate into pieces and splatter all over [...]”

Karin Deshore (EMT)

“[...] all over it was bodies and parts just scattered.”

Michael Ober (EMT)

“I seen body parts just going everywhere when they hit the ground, so when one guy hit, [...] you see his arms and legs, just flew right off.”

Decosta Wright (EMT)

“You could hear when they hit the ground, bang, bang, and the body parts just dismantling all over the place.”

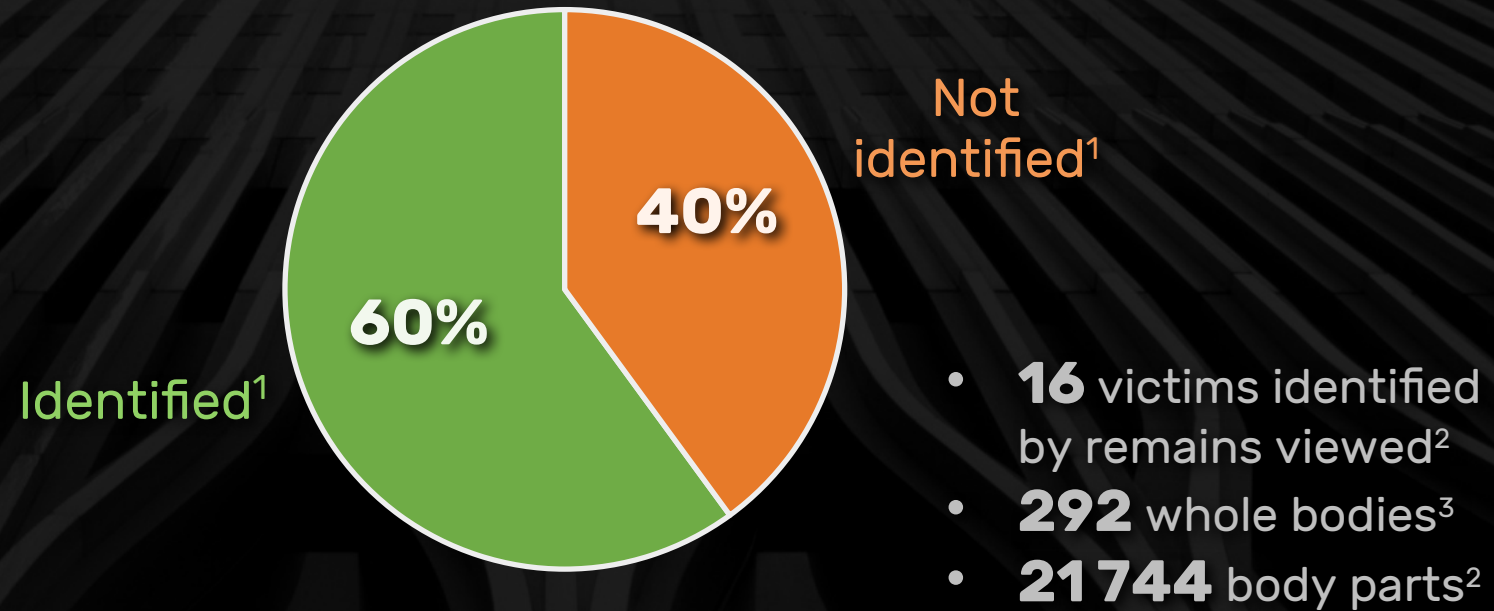

Arthur Myers (firefighter)

“[He] just vaporized. The guy just disappeared. There was no longer a body, just a big cloud of red.”

Bertram Springstead (firefighter)

7. Remains of 40% of the victims at the WTC have not been identified.

The background is a close-up, slightly blurred image of a book cover. The top part of the cover is dark blue with the text '911 Finding the Truth' in white. Below that, there's a red and white striped pattern. At the bottom, the words 'WHERE DID THE TO' are visible in large, bold, red letters on a dark blue background. A dark grey rounded rectangle is overlaid in the center, containing the main title in yellow text.
